## Screen Pro

*An alternative to expensive, high-speed, vinyl roll up doors*

**TMI introduces the new, innovative, roll-up door system called the Screen-Pro™.**

### **Features:**

- Modular Panels (clear, colored, mesh)
- Extruded Aluminum Wind Bars
- Save-T Breakaway Bars
- Extruded Aluminum Guide Tracks
- Optional Motor

### **Benefits:**

Mesh and vinyl panels protect against flying insects, birds, leaves and debris

Improves employee comfort, security and productivity while creating a barrier to deter theft, trespass and pilfering

Keeps out the cold, wind, dust, airborne pollutants and street noise with solid PVC panels (opaque or clear)

### **Additional Options:**

#### **Aluminum Valance:**

Aesthetically-pleasing PVC vinyl or aluminum valance protects the drum and roll-up door mechanisms

#### **Remote Activation:**

Sensors on door for remote opening and closing

#### **Reversing Edge Bar:**

Automatically raises the door when it comes down on an object in the opening

# Keep Bugs Out!

*With TMI's Complete Line of Insect Control Products*

## Air Curtain

*A shield of air that controls internal temperatures and keeps insects out*

TMI's new line of Save-T air curtains feature a uniquely-designed air compression chamber that makes use of the Coanda effect principle. As air leaves the blowers, it collects in a chamber where it is compressed into a concentrated stream. The chamber helps the air curtain more effectively cover the entire door opening. The concentrated airstream helps reduce unwanted air infiltration while enabling doorways to be left open so that people, equipment and inventory can pass freely between them.

### **Benefits**

- Reduce energy costs
- Increase customer and employee comfort
- Keeps insects from entering facility

## Insect Control Yellow

*Easy to install, fits 99% of strip door hardware on the market, flexible anti-pest strips*

### **Benefits:**

- Unique color helps repel insects
- Used for strip doors
- Flexible and affordable
- Easy to Install

### **Features:**

- Available in ribbed and standard flat
- Non-phthalate formula now available
- TMI provides complete hardware systems for doors of all sizes

*Keep insects away in areas where strip doors are already installed.*

## Bug Pro

*Keeps insects out while promoting easy accessibility*

### **Benefits:**

- Protects against flying insects, birds, leaves, and debris with mesh panels
- Improves employee comfort, and productivity while allowing air to circulate through "open" passageways
