

“Opening to Your Standards”

HD HYDRAULIC DOORS

HEAVY DUTY HYDRAULIC DOOR SYSTEMS

- Single panel door system designed **exclusively for Aviation**
- Engineered for both **new or existing structures**
- Standard submersible hydraulic pumps provide **ultra quiet operation**
- Smart Door Technology allows for a **soft start open and close**, unique to the HD Hydraulic Doors
- Smart Controller offers easy **one-touch operation**

BOTTOM ROLLING DOORS

VERSATILE BOTTOM ROLLING HANGAR DOORS

- “Smart Rail” door configurations provide ultimate flexibility and **hangar access** for FBO, MRO, charter and Commercial Airline facilities
- Quick disconnect pivot mounted operators allow for **easy manual operation**
- Dual opposing weather seal system is factory installed and provides **superior sealing** compared to flap seals
- **Multiple configurations** available including: uni-directional, bi-parting, independent and “Smart Rail”
- Top guide and bottom rail assemblies are factory assembled for **ease of installation**

TIP-UP CANOPY DOORS

ONE-PIECE TIP-UP HANGAR DOOR SYSTEMS

- Fast operating and **weather tight** construction minimizes heating and cooling loss, reduces waiting time and increases productivity
- Minimal side room requirements, providing **maximum access** to the hangar opening
- Counterweighted design allows for **easy manual operation**
- Fabricated in modular assemblies to minimize field installation costs and assure a **quality installation**

CUSTOM & RETROFIT DOORS

CUSTOM SOLUTIONS / EXISTING HANGAR APPLICATIONS

- Door Engineering provides on-site inspections, design and scope-of-work specs to **ensure clients' requirements are met**
- Full range of **replacement components** available
- **Drop-In Operators** are an ideal solution for facilities that have an existing manual door
- Contact us for assistance **refurbishing your existing doors** or for complete **retrofit and replacement**
