

Opening to Your Standards.

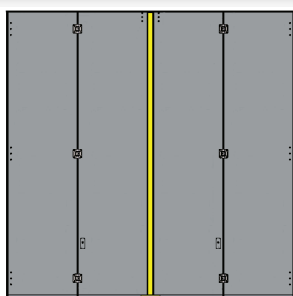

Door Engineering's Hurricane Rated Four-Fold door system has been updated! The door system has been re-engineered to meet today's codes requiring higher wind load ratings and to offer more glazing options. This system is also available in an XT (exterior folding) configuration for more flexibility.

## New Features

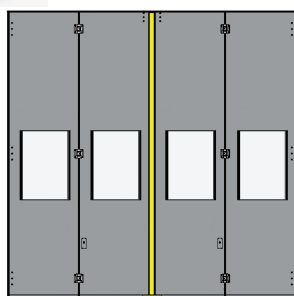

- Cremone lock concealed within the panel
- Weather seals with no exposed fasteners
- Stainless steel hinges
- Insulated glass
- Additional glass options
- Higher windloads-120psf

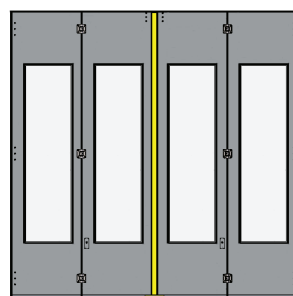

## Glazing

Opening to Your Standards.

### Exterior Folding

- Doesn't require additional bay space
- Same heavy duty construction as interior folding door
- Perfect option when refurbishing an existing station

### Door Preservation

- Stainless steel hinges prevents rusting at the hinge knuckles
- Exterior window frame trim eliminated to prevent moisture penetration
