

TMI BIRD-PRO ROLL-UP BARRIERS

ROLL-UP DOORS WITH BIRD MESH

TMI's Bird-Pro roll-up barriers block birds, large insects and other pests while allowing for superior airflow and ventilation. Plus, the Bird-Pro roll-up barriers act as an additional safety and security barrier in the loading dock area. By working as a physical deterrent, barriers promote a safer environment. Bird-Pro barriers fill your opening, preventing unwanted outside traffic from passing pedestrians, birds, rodents, and large insects while allowing maximum airflow and ventilation.

TMI BIRD-PRO DOORS HELP MEET AIB INTERNATIONAL CONSOLIDATED STANDARDS FOR INSPECTION

FEATURES & BENEFITS:

- Separates environments
- Allows for airflow and ventilation
- Blocks out bugs and other pests
- Helps meet AIB International Consolidated Standards for Inspection
- **Modular Panels** - interchangeable door panels allows for various material options.
- **Extruded Aluminum Guide Tracks** - UHMW* inserts reduce friction and add additional protection & security.
- **Extruded Aluminum Wind Bars** - High strength stiffeners combat winds and negative air pressure.
- **Breakaway Bar** - Prevents screens from breaking if hit. Bottom bar releases in either direction and can easily be put back into the track.

OPTIONS:

- NEMA-4 upgrade
- Safety reversing edge
- Pullcord station
- Remote control
- Motion sensors
- High cycle upgrade

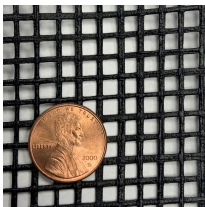

MOUNTING STYLES:

- **In-Jamb** - Requires approximately 8.5" headroom and 4.5" of space on each side of the jamb.
- **Face of Wall** - Use when no existing door is present. Can be mounted inside or outside. Hoods available.
- **Inside Stand-Off** - Mounts in front of existing roll-up or sectional door.

STANDARD MESH OPTIONS:

Open weave Bird-Pro - Black only - 14' x 16' max.

Optional tight weave "Gnat-Pro" available in gray.

* Visual shows actual size of mesh compared to a penny.

Model	Description
