

DUTCH DOOR INSTALLATION INSTRUCTIONS

1. Follow Durulite Door installation instructions as specified. Using a plumb bob, plumb the centerline of the template for both the Main Doors and the Dutch Top Doors.
2. Remove the backing on the tape located at the bottom of the Top Seal Gasket, See Door Section.
Align the center of the Blade on the Top Seal Gasket and press firmly. The tape is designed to hold the Top Seal in place only until the screws have been inserted.
3. Insert fasteners provided, into pre-drilled holes in the Top Seal Gasket and tighten firmly.
4. Proceed with installation instructions for Main Doors.
5. Follow the same procedure to mount the Dutch Top Doors. Follow instructions to install adjustable spring assist on Dutch Top Doors. Adjust their in/out swing and up/down location. The bulb seal of the Main Door should be in contact with the bottom edge of the Dutch Top Doors. See Door Section.
