

TMI ARMOR-BOND®

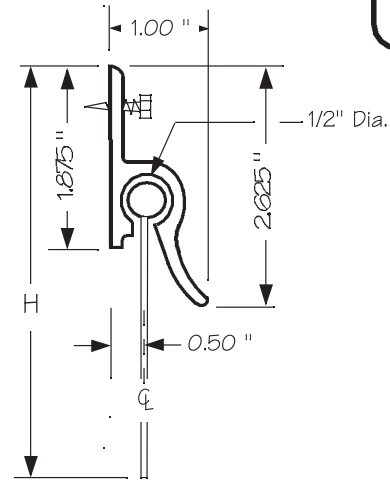

STRIP SYSTEM SUBMITTAL

OPENING SIZE _____ W x _____ H

STRIP SYSTEM SIZE _____ W x _____ H

HEAVY DUTY
FLAT WALL
BONDED BEAD

TMI ARMOR-BOND

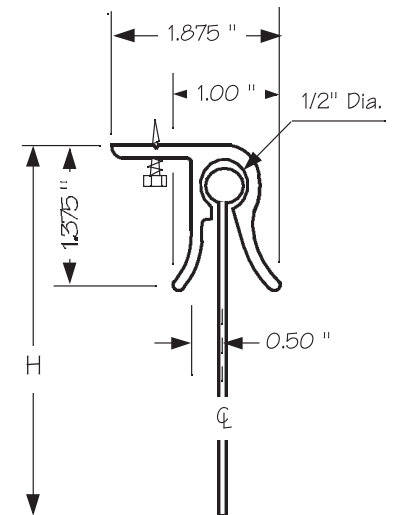

All 80 mil, 120 mil & 160 mil thick curtains shall have a Polyester Webbing RF welded to the top of each bonded bead strip to virtually eliminate tearing and stress cracking at points of attachment to the mounting bar.

MOUNTING HARDWARE:

Bonded Bead Hardware is a one piece extruded design with built-in relief flanges, allowing the strips to pivot freely, reducing stress and drastically increasing the life of the strips.

5/16" mounting holes shall be punched at 24" o.c. unless otherwise requested.

HEAVY DUTY
IN JAMB
BONDED BEAD
